**NOTE:** Several wires can be combined in one yellow or blue eyelet to ease crowding on the terminals.

**NOTE:** Given the large number of ground wires on post 5, it is necessary to combine some of the ground wires in one blue ring terminal. For example the 3 supply valve white ground wires, the brown and the black wire from the switch and the 3 ground wires coming from the gauges.

**NOTE:** Several wires can be combined in one yellow or blue ring terminal to ease crowding on terminals.

**NOTE:** Remember to put the rubber post covers on each post after wiring is complete. This will prevent any accidental shorting of the terminals.
